

Website Content Manager

How to update the PACA website. Change words and pictures, hit save, done. You never touch any code.

paca1505.org/admin/ · Performing Artists Collective Alliance · v1

The PACA site runs itself off a simple editor called the content manager. You log in, edit a section, and a minute or two later the live site updates on its own. This handbook covers the questions that come up most and the handful of tasks you will actually do.

Getting in

1. Go to paca1505.org/admin/ in any browser. (While the new domain is still being set up, use the address Dan gives you.)
2. Sign in with the email and password set up for you. If you do not have one, ask Dan to invite you.
3. You land on a list of sections down the left side. Click one to start.

THE ONE THING TO REMEMBER

Nothing happens instantly. After you click **Save**, the site takes about one to two minutes to rebuild. Then refresh the page to see your change. On a phone, pull down to refresh. If it still looks the same, wait a moment and refresh again.

The sections at a glance

SECTION	WHAT IT CONTROLS
Homepage	The big text at the very top, plus an optional announcement bar.
Shows & Events	Performances, parties, fundraisers, and special events. These appear on the home page and What's On.
Site Settings	Address, phone, and the main links used everywhere: tickets, donate, merch, Instagram, Facebook.
Who We Are	The "Our story" text on the about page.
Board & Staff	The people listed on the about page.
Gallery	The photo archive.
Auditions	The auditions information text.

Rent Our Spaces	The rentals information text.
What's Here (Tenants)	The building directory of resident artists and businesses.
Sponsors	The "Special thanks to" logos that scroll along the bottom of every page.

Golden rules

- **Give it a minute.** Saves are not live instantly. Wait one to two minutes, then refresh.
- **You cannot really break it.** Every save is recorded and can be rolled back, so edit with confidence.
- **One feature at a time.** Only one show or event should be featured on the home page.
- **House style: no long dashes.** Use a plain hyphen or the word "to". Keep summaries to a sentence or two.
- **Images:** clear, not enormous. A long edge around 1600 pixels is plenty for photos. Logos look best as transparent PNGs.
- **One editor per entry.** Two people on the same entry at once means the last save wins.

How to do the common things

1 Add a show or event

1. Click **Shows & Events**, then **New**.
2. Enter the **Title**, then pick a **Discipline**. Use **Event** or **Party** for things that are not a performance (fundraisers, parties, watch events).
3. Set a **Start date** (this sorts the listing). Add a friendly **Date label** if you want nicer wording, like "Sat, Aug 9".
4. Add a **Showtime** and a one or two sentence **Short summary**.
5. Optional: upload a **Poster image**, and paste a **Ticket link** if this event has its own. Leave it blank to use the site's default tickets link.
6. Write the **Full description**, set **Status** to "upcoming", and Save.

2 Spotlight one thing on the home page

1. Open the show or event under **Shows & Events**.
2. Turn on **Feature on the home page** and Save.
3. Only one at a time. Featuring a new one means switching the old one off.

3 Take something down

Open it under **Shows & Events** and set **Status** to "past" (hides it from the calendar but keeps the record), or delete the entry. If it was featured, switch the feature off too.

4 Post an announcement, or change the top text

1. Click **Homepage**.
2. For a banner at the very top, type your message into **Announcement** (and an optional link). Clear that field to remove the banner.
3. To change the big headline or intro, edit **Headline line 1**, **Headline line 2**, and the **Intro paragraph**. Save.

5 Add or swap a sponsor logo

1. Click **Sponsors**, then **New**.
2. Enter the **Name**, upload the **Logo**, add a website **Link** if you have one, and set an **Order** number (lower shows first). Save.
3. Use a transparent PNG that reads on a dark background. If a logo disappears, it is dark artwork on a clear background, so ask for a light or white version.
4. To remove one, open it and delete it. The bar hides itself when there are none.

6 Add or edit a board or staff member

1. Click **Board & Staff**, then **New**.
2. Enter **Name** and **Role**, choose the **Group** (Board or Staff), optionally upload a **Photo**, set an **Order**, and write a short **Bio**. Save.
3. No photo is fine. The card looks clean without one.

7 Add gallery photos

1. Click **Gallery**, then **New**.
2. Upload the **Image**, give it a **Title**, pick a **Category**, and optionally add the **Production**, **Year**, and a **Caption**. Save.

8 Update Auditions or Rentals info

Click **Auditions** or **Rent Our Spaces**, edit the text, and Save. These are straightforward text pages.

9 Add or edit a tenant (What's Here)

1. Click **What's Here (Tenants)**, then **New**.
2. Enter the **Name** and **Unit** (like 2N1, which also becomes the address), the **Type**, an optional **Logo**, a short **Summary**, and contact details. Save.
3. If a tenant runs their own website, turn on the external link option so their card points there instead of to a page on our site.

10 Change the main links and contact info

1. Click **Site Settings**.
2. Update **Tickets**, **Donate**, **Merch**, **Instagram**, **Facebook**, the phone, or the address. Save.
3. These feed every page at once, so you change them here only, never on individual pages.

Common questions

I saved but the website looks the same.

Give it a minute or two to rebuild, then refresh. On a phone, pull down to refresh or close and reopen the tab.

How long until my change is live?

Usually one to two minutes after you Save.

How do I remove a show, sponsor, or person?

Open the entry and delete it. For a show that already happened, you can instead set its Status to "past".

I made a mistake. Can it be undone?

Yes. Every change is saved in history and can be reversed. Tell Dan what happened and roughly when.

A sponsor logo is invisible.

It is almost always dark artwork on a transparent background, which vanishes on the dark bar. Use a light or white version of the logo.

What size should images be?

Photos: a long edge around 1600 pixels. Logos: a transparent PNG. Avoid huge multi-megabyte files.

Do I ever need to touch code?

No. Everything in this handbook happens in the editor.

I cannot log in.

The editor's access token expires now and then. If your password is right and it still fails, that is usually why. Tell Dan and he will refresh it.

Can two of us edit at the same time?

Different sections, yes. The same entry at the same time, no, because the last save wins.

Stuck, or something looks wrong?

Dan Lucore, Technical Director · dan@paca1505.org · 814-490-0605

When in doubt, do not delete in a panic. Note what you were doing and reach out.
