

INVENTORY APPS — OVERVIEW

SOP 5

REV

MAY 31, 2026

START 01

CONNECT

Visit the app URL and bookmark it on your device.

START 02

SYNC FIRST

Always hit  **SYNC** before making any changes.

START 03

SYNC AFTER

When done, hit  **SYNC** to push changes to cloud.

THE THREE APPS

 Supplies

pacasupplies.netlify.app

Tracks office, cleaning, backstage, and production consumables. Set reorder thresholds, log supplier contacts. **Check before ordering** — it may already be in stock.

 AV Inventory

pacaavinventory.netlify.app

Full catalogue of lighting, sound, video, and misc gear. Tracks condition, location, serial numbers, replacement cost, and check-in/out status. **Update when gear moves or is serviced.**

 Snack Bar

pacasnack.netlify.app

Manages snack bar and merch inventory. Log event sales, track stock levels, view revenue history. **Use Pre-Event Snapshot before every show.**

HOW SYNC WORKS

 THE SYNC BUTTON

The  **SYNC** button does a smart two-way merge: pulls the latest cloud data, combines with your local changes, then pushes everything back. **It will never overwrite someone else's work.**

 ALWAYS SYNC BEFORE EDITING

Editing without syncing first means working on stale data. The safe habit: **open app → SYNC → edit → SYNC.**

SYNC FAILED?

Check your internet. Your changes are saved **locally** and won't be lost — just sync again when you're back online.

SNACK BAR — EVENT WORKFLOW

- 1 Before the show:** Open Snack Bar app → hit **SYNC** → go to **Log Event Sales** → hit **Pre-Event Snapshot** to capture all current stock counts.
- 2 After the show:** Return to **Log Event Sales** → enter the event name → adjust quantities sold for each item → hit **Commit Event Log**.
- 3** Stock levels update automatically. Hit **SYNC** to push everything to the cloud.

COMMITTED LOGS ARE PERMANENT

Mistakes? Go to **Sales Log** → find the event → hit **X** → enter the password → confirm delete. **Stock restores automatically.**

AV INVENTORY — KEY TASKS

TASK	HOW TO DO IT
Check gear in / out	Find item → EDIT → toggle the Checked Out switch
Update condition	Find item → EDIT → change the Condition field
Flag gear for sale	Find item → EDIT → set Condition to “For Sale”
Add new equipment	Hit + ADD ITEM and fill in all fields
Filter by department	Use category buttons: Lighting / Sound / Video / Misc
Export to spreadsheet	Hit CSV to download a full spreadsheet

Deleting items: The delete button is inside the **EDIT** screen — not the main list. A password is required. Contact Dan if you need it.

INVENTORY ITEMS CANNOT BE UNDONE

Deleting an item from AV Inventory, Supplies, or Snack Bar is **permanent**. The exception: deleting a Snack Bar event log entry **will** restore stock automatically.

QUICK REFERENCE — ALL APPS

BUTTON	WHAT IT DOES
SYNC	Two-way cloud sync — use this first and last every session
CSV	Download a spreadsheet of all current data
PRINT	Opens a clean print-friendly view
+ ADD ITEM	Add a new item to the inventory
EDIT	Edit details or delete an entry (password required to delete)
	Cloud sync settings — admin use only
