

Managing the Tenant Portal

Performing Artists Collective Alliance

Owner: Technical Director **Audience:** PACA staff **Version:** 1.0 **Updated:** June 2026

1. What the tenant portal is

The tenant portal is a page on the PACA website for building tenants. It is not linked in the public nav and is not indexed by search engines. It has two parts: a **building calendar** showing events relevant to the whole building, and a **request form** where tenants submit repairs, maintenance issues, building questions, and calendar requests. Tenant submissions arrive by email when a form is completed.

2. The URL

Staff access it at: paca1505.org/tenant

Share this address with tenants. No login is required to view the calendar or submit a request.

3. The building calendar

The calendar at the top of the page is a dedicated Google Calendar for building events. Any staff member with access to that calendar can add events. Good candidates for the calendar:

- Planned maintenance (HVAC, electric, plumbing)
- Fire alarm tests or inspections
- Shared-space bookings (*future plan*)
- Utility outages or interruptions
- Building-wide events (Gallery Night, open studios)
- Pest control or cleaning visits
- Any event tenants need to plan around

Rule of thumb: if it affects more than one tenant or the common areas, it belongs on the building calendar. Personal rehearsal bookings and internal PACA meetings do not.

4. Handling incoming requests

When a tenant submits the form, an email notification is sent to the address on file for building requests. The submission includes the tenant's name, unit, contact info, request type, description, and any photos attached.

1. **Acknowledge within one business day.** Reply to the tenant's email to confirm receipt and give a rough timeline.
2. **Triage by type.** Repairs and building issues go to whoever handles facilities. Calendar requests go to the staff member managing the building calendar. Questions get answered directly.
3. **Follow up when resolved.** A quick "this has been fixed" email closes the loop and builds trust.

Finding past submissions: Contact the Technical Director for access to the full submission log, including photos and timestamps.

5. Calendar requests

When a tenant selects "Calendar request" in the form, they are asking for something to be added to or removed from the building calendar. Standard workflow:

1. Review the request: is it appropriate for the building calendar (see section 3)?
2. If yes, add it to the Google Calendar with a clear title and the tenant's unit number. Example: *Maintenance window – 3N2, 9 to 11 AM.*
3. Reply to the tenant confirming it has been added.
4. If the request is not appropriate for the shared calendar, explain and offer an alternative.

6. Urgent issues

The tenant form is not monitored around the clock. Tenants are instructed to call for urgent building issues rather than submit a form, but occasionally someone will use the form for something time-sensitive anyway. Check submissions at least once per business day.

True emergency (fire, medical, gas): 911 always comes first.

Urgent building issue (flooding, no heat, lockout): PACA main line **(814) 616-7222** or Dan Lucore **814-490-0605**.

7. Sending the tenant guide

New tenants should receive the **Tenant Page Guide** PDF when they move in. It covers the portal URL, the calendar, and how to submit a request. It also has the emergency contact numbers. A copy lives in the Tech SOPs on the website and a printed copy should be included in any new-tenant welcome packet.

Questions or access issues: Dan Lucore, Technical Director · dan@paca1505.org · 814-490-0605
