

STANDARD OPERATING PROCEDURE

Board & Staff Portal

Performing Artists Collective Alliance

Owner: Technical Director **Audience:** Board & Staff **Version:** 1.0 **Updated:** June 2026

1. Purpose

The Board Portal is a private, password protected area of the PACA website for board members and staff. It holds two things: the board calendar and a message board for planning events, productions, and staff business. It is not linked anywhere public and is hidden from search engines.

2. What you need

- A web browser on any phone, tablet, or computer.
- The portal web address (below).
- The shared access code. Get it from the Technical Director and do not post it publicly.

3. Logging in

1. Go to: <https://paca1505.org/board/>
2. Type the access code into the ACCESS CODE box.
3. Press **Enter** or tap **ENTER**.

You stay logged in on that device until you tap **LOG OFF** or close the browser. There are no separate usernames: everyone uses the same access code.

Keep this printed copy secure. Write the current access code here only on the booth copy:

Access code: _____

4. The calendar

After you log in, the board Google Calendar is at the top. Use it for rehearsals, meetings, load ins, and events. **Open full calendar** opens it in its own tab. Calendar entries are managed in Google Calendar by the office, and changes there show up here automatically.

5. How the message board is organized

The board has three levels:

Sections are the headings (for example Event Planning, Production, Staff Notes). The Technical Director sets these up.

Topics are individual discussions inside a section.

Replies are the messages within a topic.

To read: tap a section to see its topics, then tap a topic to open the full thread. Use the breadcrumb at the top (SECTIONS / ...) to go back, and tap **Refresh** to pull in new posts. The board does not update on its own.

6. Starting a topic

1. Open the section it belongs in.
2. In the new topic box, enter a **Title**, your **Name**, and a first **Message**.
3. Tap **Post Topic**.

7. Replying

1. Open the topic.
2. Type in the reply box at the bottom, including your name.
3. Tap **Post Reply**. Tap **Refresh** to see replies others have added.

8. Archiving a finished topic

When an event or discussion is over:

1. Open the topic.
2. Tap **Archive topic** and confirm.

The topic becomes read only (no new replies) and drops into the **Archived** list at the bottom of its section. To bring it back, open it from the Archived list and tap **Reopen topic**.

9. Good habits

- Always post under your name so people know who said what.
- Keep topics in the right section so things stay tidy.
- Archive a topic once its event has passed.
- Do not put highly sensitive information (financial account numbers, legal matters, or personnel details) in plain text. Use an access controlled Google Drive folder for those.
- The access code is shared by the whole group. Do not share it outside the board and staff. If it needs to change, tell the Technical Director.

10. If something goes wrong

- **ACCESS DENIED:** the code was mistyped or has been changed. Re-enter it carefully. If it still fails, ask the Technical Director for the current code.
- **Page will not load or shows an error:** contact the Technical Director.
